KNOW YOUR STUFF

Product safety tracking for owners of large property estates

There are hundreds of appliance and product safety recalls every year, leading to tens of millions of dangerous products in UK circulation. This makes it extremely challenging for landlords to stay on top of the serious and growing risks that dangerous appliances and devices pose to their employees, properties and reputations.

Infoo has developed a simple tech-enabled way to continuously monitor and manage these recall and safety risks and help protect you, the occupiers of your properties and their families.

KEY FEATURES

- Click & Protect, easy to use
- Protects against unforeseen, changing risks
- Tracks electrical appliances, portable devices & battery risks
- Continuous monitoring approach to product recalls
- Industry-leading breadth of data sources
- Supported by Trading Standards and London Fire Brigade

GROWING RISK

Integrated & Free-standing Appliances

Only **10-20%** of appliance recalls reach appliance owners, leading to risks of fires or malfunctions which threaten lives, property and reputations

Portable device risks

Identify and manage the risks posed by devices brought into your properties

Liability

Overlooking these factors can lead to legal and reputational issues and have a profound adverse impact on organisations

Risks increasing year-on-year

This is a growing problem, fuelled by the proliferation of lithium battery powered devices and cheap imports

EASY TO MANAGE WITH INFOO

1 Industry-leading data sources and AI-driven monitoring technology provides Click & Protect risk management

2 Infoo tracks and manages safety data for integrated and free standing electrical appliances on an ongoing basis.

3 Infoo can uniquely manage the unquantified risks occasioned by tenant introduced devices such as battery powered e-bikes & scooters

4 Check appliances on-site with Infoo's proprietary visual label scanning or supply your inventory for peace of mind certification and ongoing monitoring

SIMPLE TO MANAGE

1 Easily capture inventory from your estate onto Infoo's secure system using our DIY or managed approach

2 Simply scan the product label on an appliance to check and track recalls and safety events going forward

3 Instantly acquire a true picture of the risks across your estate to identify any exposures

4 Actively monitor developments, so you are notified of any future recall events as they occur

*Simple resolution **of** recall or safety issues*
